

21st International Conference on Fluid Sealing

Milton Keynes, UK

30 November – 1 December, 2011

Sponsorship opportunities

A full range of imaginative sponsorship opportunities are available and can be tailored to suit your company's individual requirements

How does BHR Group support their sponsors?

Sponsorship of Multiphase technology Conference represents an excellent opportunity for your organisation to establish its presence and increase its visibility in this growing marketplace, both before and during the event.

- BHR Group promotes Sponsors' in all marketing and in the registration leaflet – displaying logos on the front cover and listed inside.
- We offer all Sponsors and advertisement in the printed conference proceedings book and CD. Every conference delegate receives a copy of the proceedings and CD as part of their delegate package and thereafter the books/CD are marketed and sold worldwide.
- Your company logo, linked to your webpage will appear on the Multiphase Technology Conference homepage.
- Your company logo on the front of all pre-event marketing material.

With some packages including;

- Exhibition space.
- Up to 3 free of charge delegate places.
- Delegate details contact list, post Conference.

Sponsorship opportunities available

You may choose as many items as you wish in your package, these will be designed as 'sponsored by your company' throughout the conference. We also offer you first refusal or repeat sponsorship for the next conference in the series.

Sponsorship can be customised to suit individual requirements

For instance the best paper award is a popular choice, this award is short-listed by the TAC and presented to the winner (approx. £500) at the gala dinner. The aim of this scheme is to encourage new engineers/graduates into the industry; this is judged on the quality of the paper and not the presentation.

BHR Group company profile

BHR Group is an independent industrial research and technology organisation specialising in the application of fluid engineering to industrial processes.

A multi-disciplinary company, we help customers from many industrial sectors, selling the Group's services and products globally through our market focussed business.

A privately owned company, we grew out of BHRA (The British Hydromechanics research Association), one of the founding Research Associations established by the UK government in the late 1940's.
